DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 18-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,306,217. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of application 09865612 show a chemical vapor deposition system. Similarly, from U.S. Patent No. 6,306,217, a chemical vapor deposition system (Fig. 1) comprising a deposition chamber 10 having a semiconductor substrate 16 and a vessel 42 containing a precursor composition 40 is shown. Thus it would have been obvious to one of ordinary skill in the art at

the time the invention was made that using chemical vapor deposition systems enables the precursor compositions from the Group IVB, VB, and VIB metals to be suitable replacements for titanium in metal-containing films on substrates in semiconductor structures.
